Client review guide

These sketches explain the current requirements and support client decisions.

Site Tracking System

Editable draw.io screen sketches · 22 October 2026

What is confirmed

Confirmed

Roles, Project → Site structure, stage assignment, online photos, review and history.

Out of scope

Excluded

Materials, GPS/location, offline queue/sync, iOS and Team login.

What does a yellow box mean?

Pending

The product decision is still pending; do not treat it as a confirmed feature.

Suggested review order

1. Overall flow
2. Roles and access
3. Web / Android screens
4. Special cases
5. Pending decisions

Review note: All people, site and project details are fictional examples. No real client or employee data is used.

Main workflow

Confirmed journey from Admin setup to stage approval

1

Admin setup

Site types + default stages
Employees + Team contacts

2

Projects

Admin creates a Project

3

Sites

Site inside the Project
plus Site Coordinator

4

Assignment

Supervisor + Team for every Stage

5

Evidence

Supervisor uploads photos online
and sends completion request

6

Review

Admin / Site Coordinator approves or requests changes

Change an active stage assignment

Confirmed

The Admin or that Site's Coordinator can change the Supervisor, Team or both.

History is preserved

Confirmed

Earlier photos, authors, progress and approval history remain; the work does not reset.

Another Coordinator's Site

Confirmed

Only basic progress is visible for a linked Site; no private photos or action controls.

Decision pending: Does final-stage approval automatically complete the Site? How is Project status derived?

Roles, platforms and permissions

Where each role signs in and its main permissions

Admin

Web + Android

View all Sites
Edit Projects/Sites
Edit People/Teams
Assign, upload, review

Project Coordinator

Web + Android

Assign on own Sites
Upload + review
Linked Site basic progress
View Team contacts

Supervisor

Android only

View assigned work
View Team contacts
Upload photos
Completion request

Execution Team

No app account

Works on site
Name + contact person
Admin edits details

Quick permission check

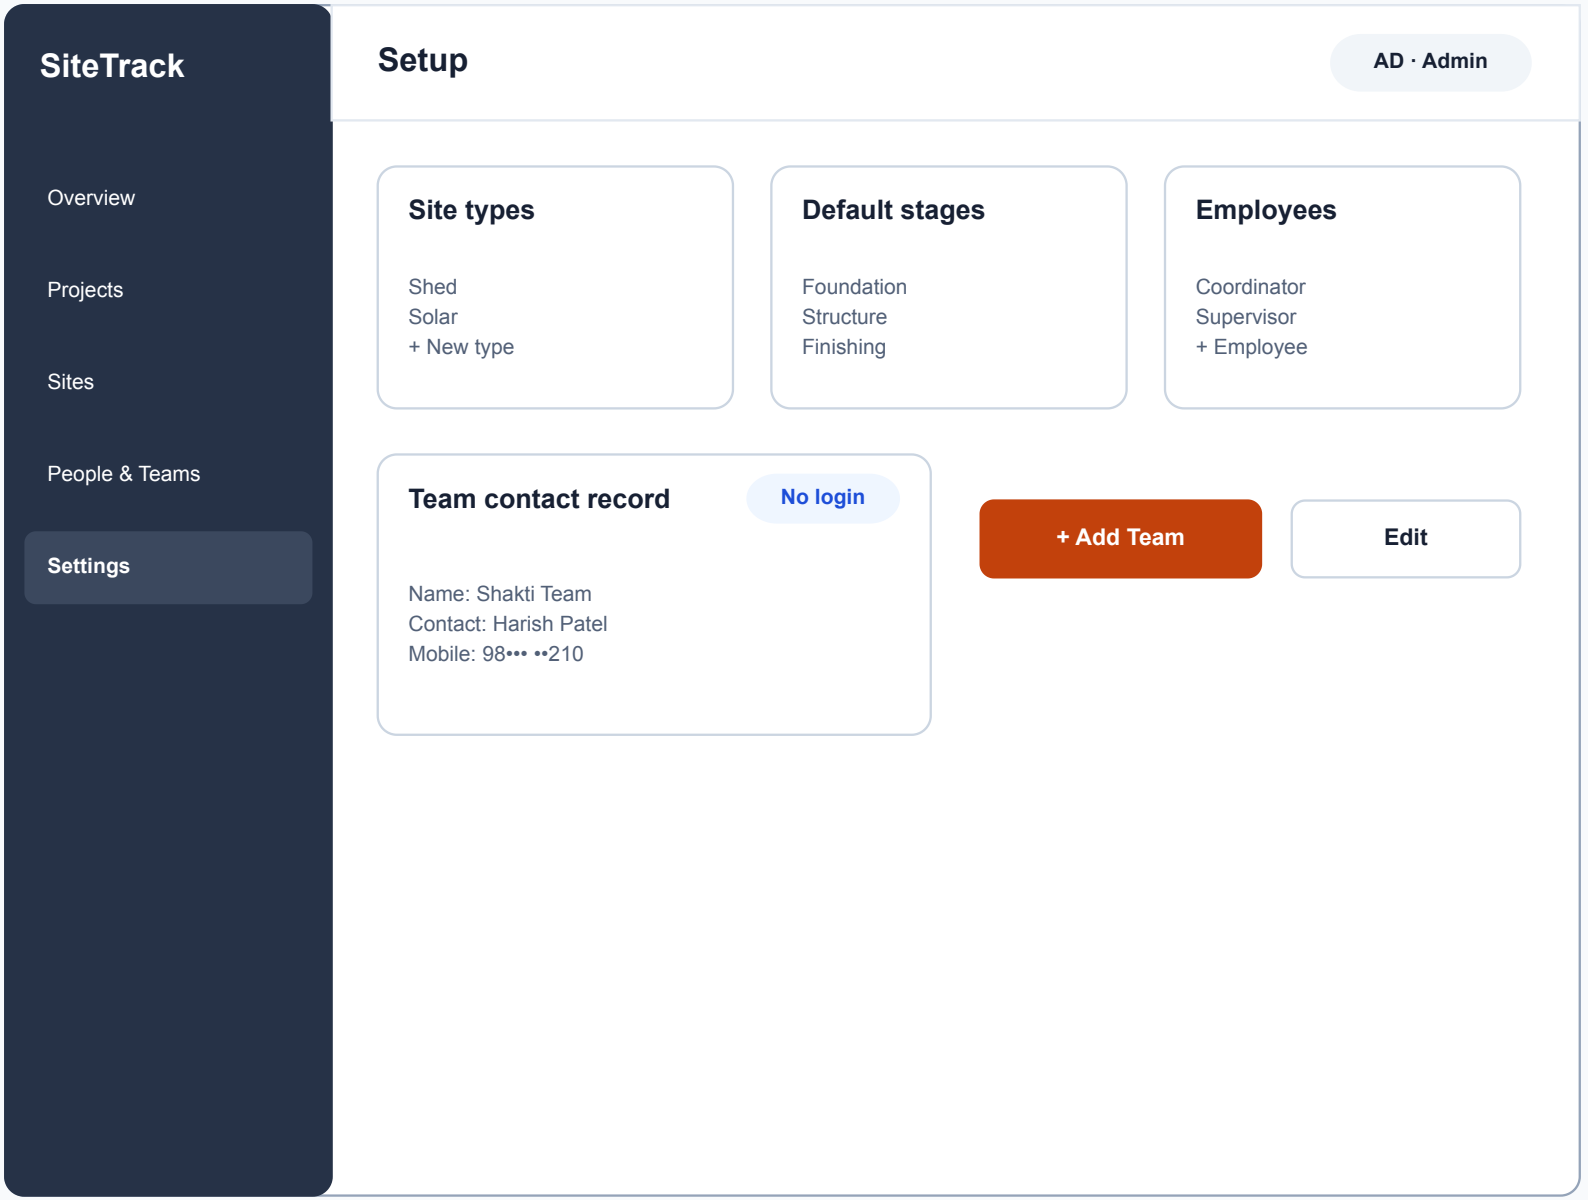

Work	Admin	Coordinator	Supervisor
Create Project/Site or change details/link	Admin	No	No
Assign/change Supervisor or Team on a Stage	All Sites	Own Sites	No
Photos upload / review	All Sites	Own Sites	Upload only
Team details edit	Yes	No	No

Review note: There is no permanent Supervisor → Coordinator mapping. A Supervisor can work across Sites owned by different Coordinators.

Admin setup and master data

Admin · Web

Site types/stages, employees and Team contact records

Review note: A Team has no account or login. Only the Admin can change Team details.

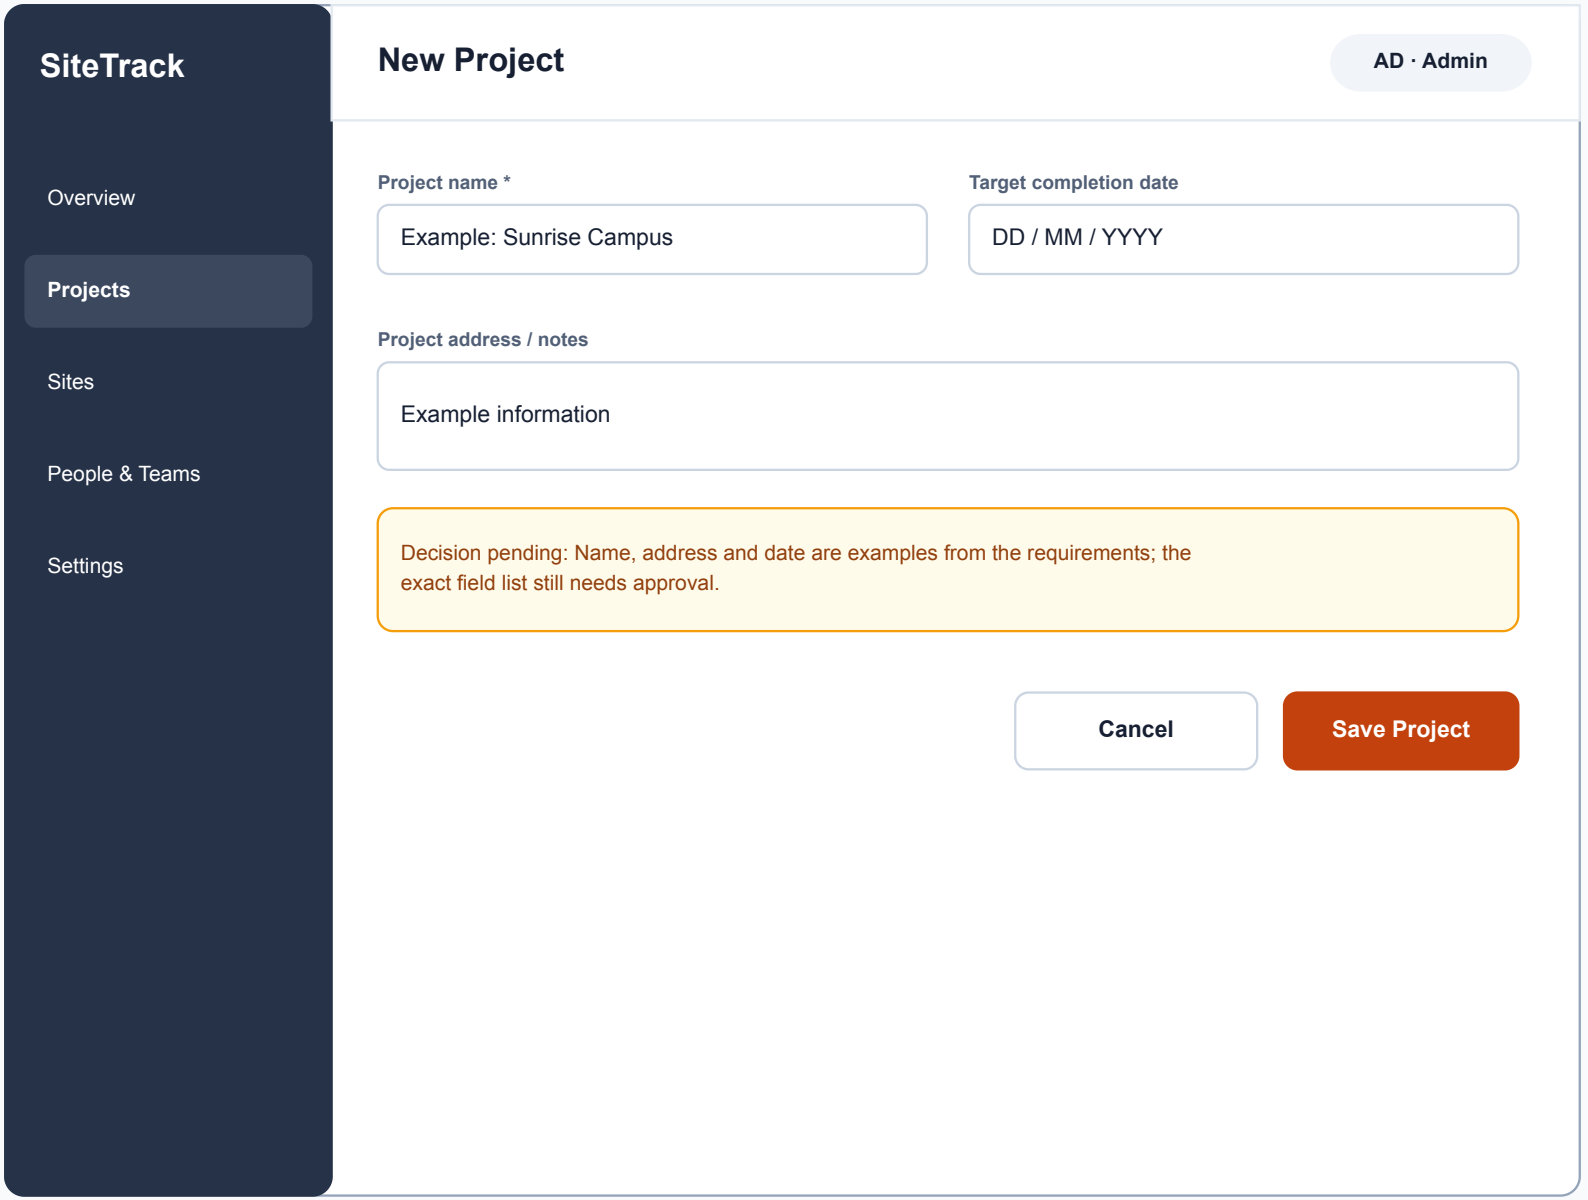

Decision pending: Stage dependency and blocking rules are not yet decided.

Decision pending: Decide the exact required fields before final design.

Create a new Project

A Site cannot exist without a Project

Admin · Web

Review note: After saving, continue to the Add Site screen.

Review note: The Coordinator is not set at Project level; select one separately for each Site.

Decision pending: Project status calculation is still pending.

Create a Site inside a Project

Site type and Site Coordinator are required

Admin · Web

SiteTrack

Overview

Projects

Sites

People & Teams

Settings

Sunrise Campus → New Site

AD · Admin

Site name *

Shed A

Site types *

Shed

Site Coordinator *

Kavita Shah

Completion date

DD / MM / YYYY

Site address

Example address

Back

Create Site

Review note: A Site must always belong to one Project.

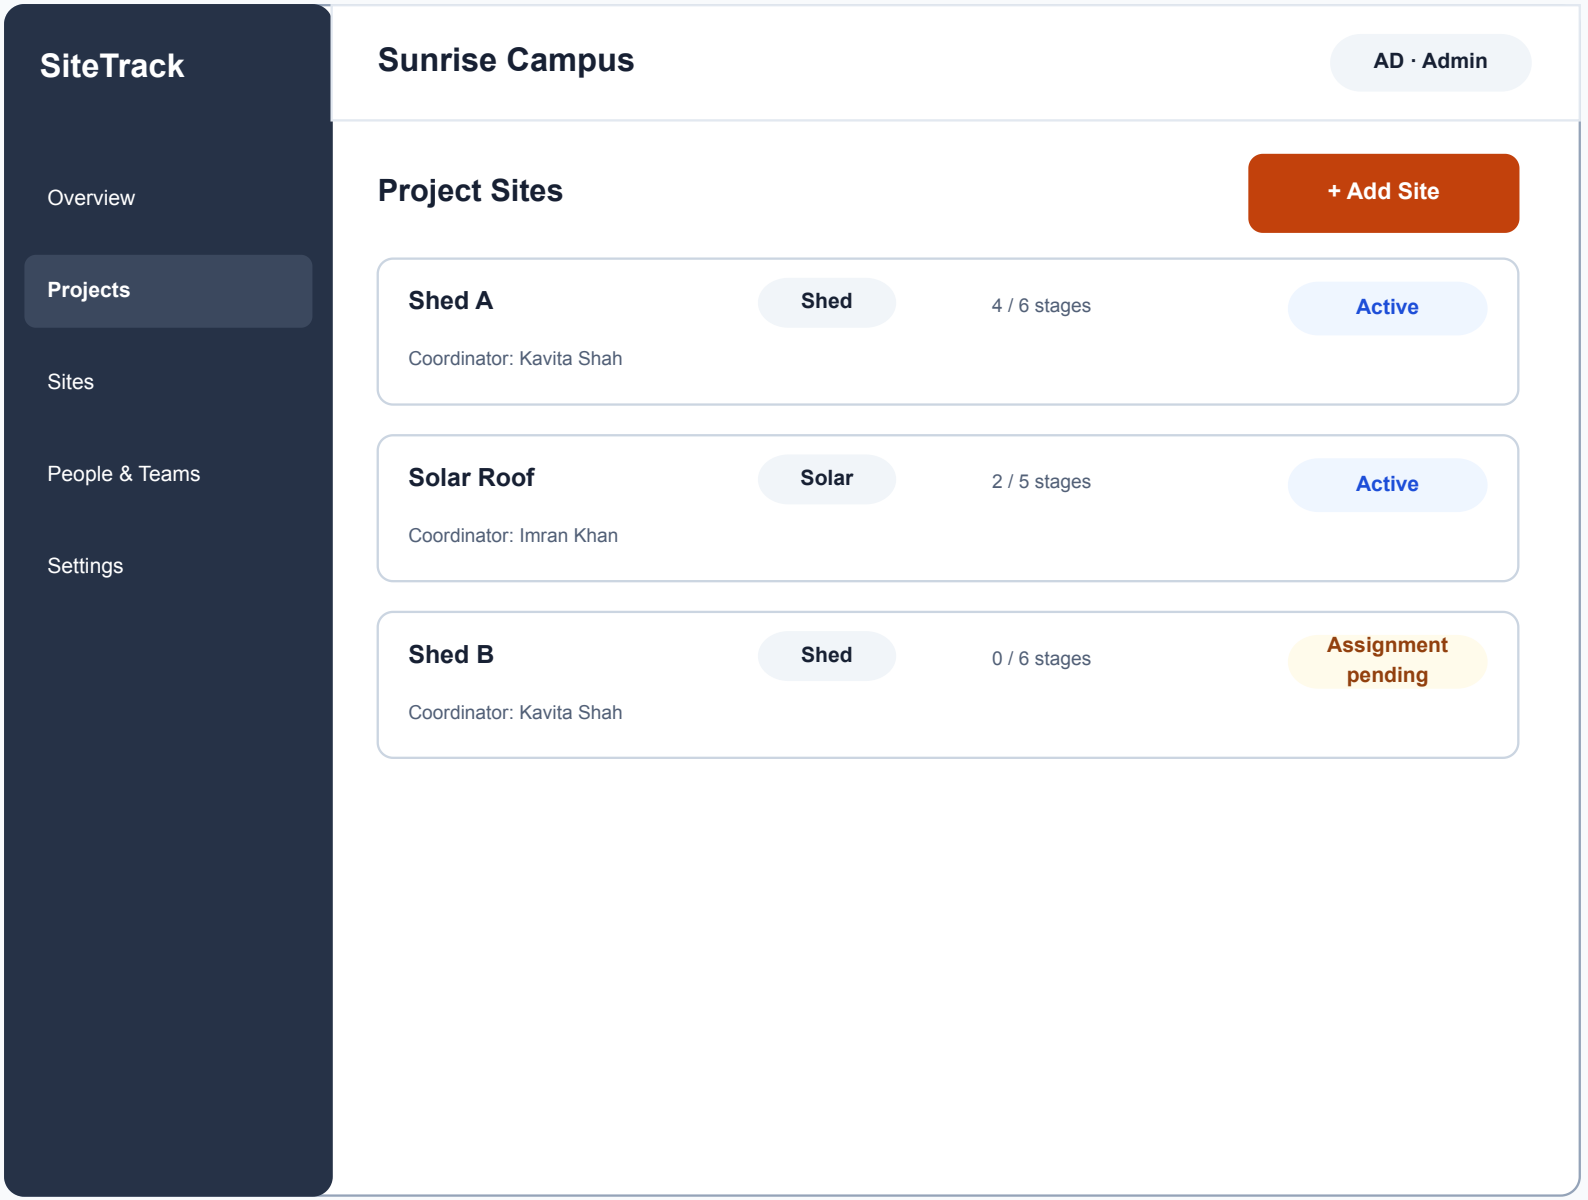

Review note: Only the Admin can move a Site to another Project.

Decision pending: The Site type supplies default stages; no stage dependency is implied.

Project overview: different Sites, different Coordinators

Admin · Web

One Project can contain different Site types

Review note: Shed and Solar can belong to the same Project; no dependency is implied.

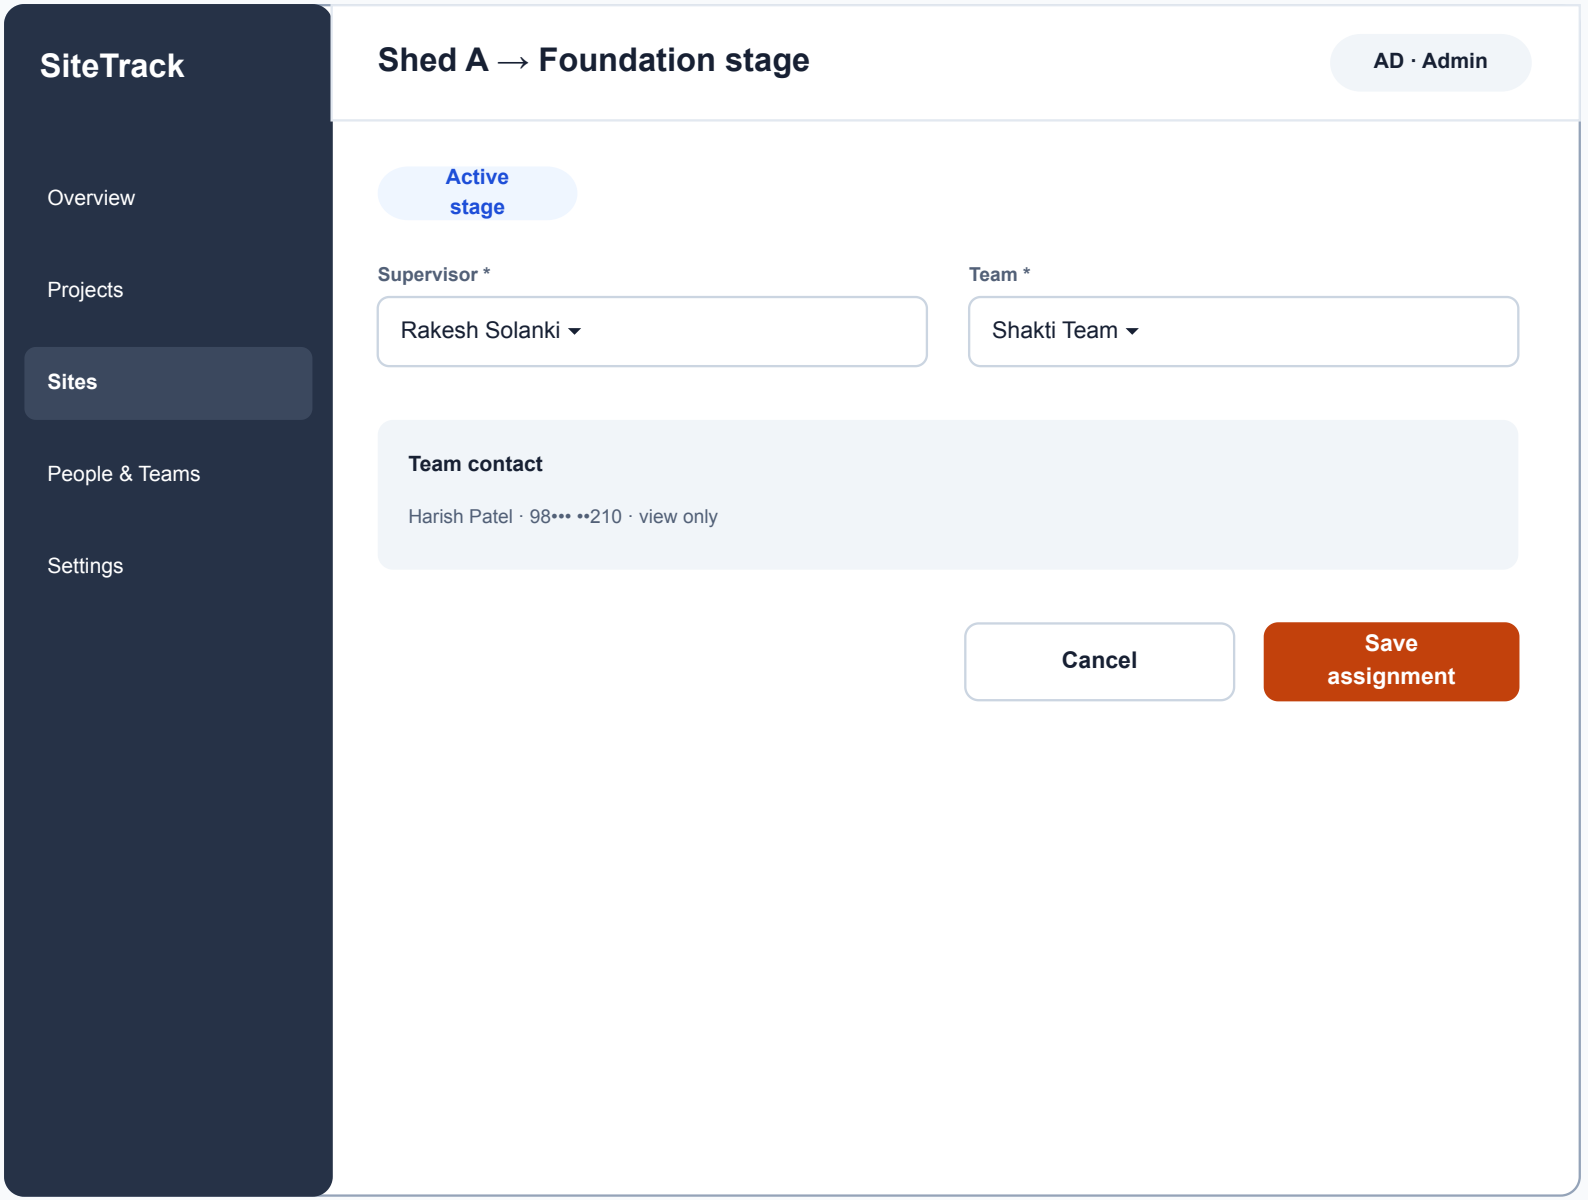

Review note: Each Site shows its own Coordinator.

Decision pending: How progress and Project/Site status are calculated is still pending.

Assign a Supervisor + Team to each Stage

Web

The Admin or that Site's Coordinator can assign or change them

Review note: A Coordinator can select any Supervisor for their own Site.

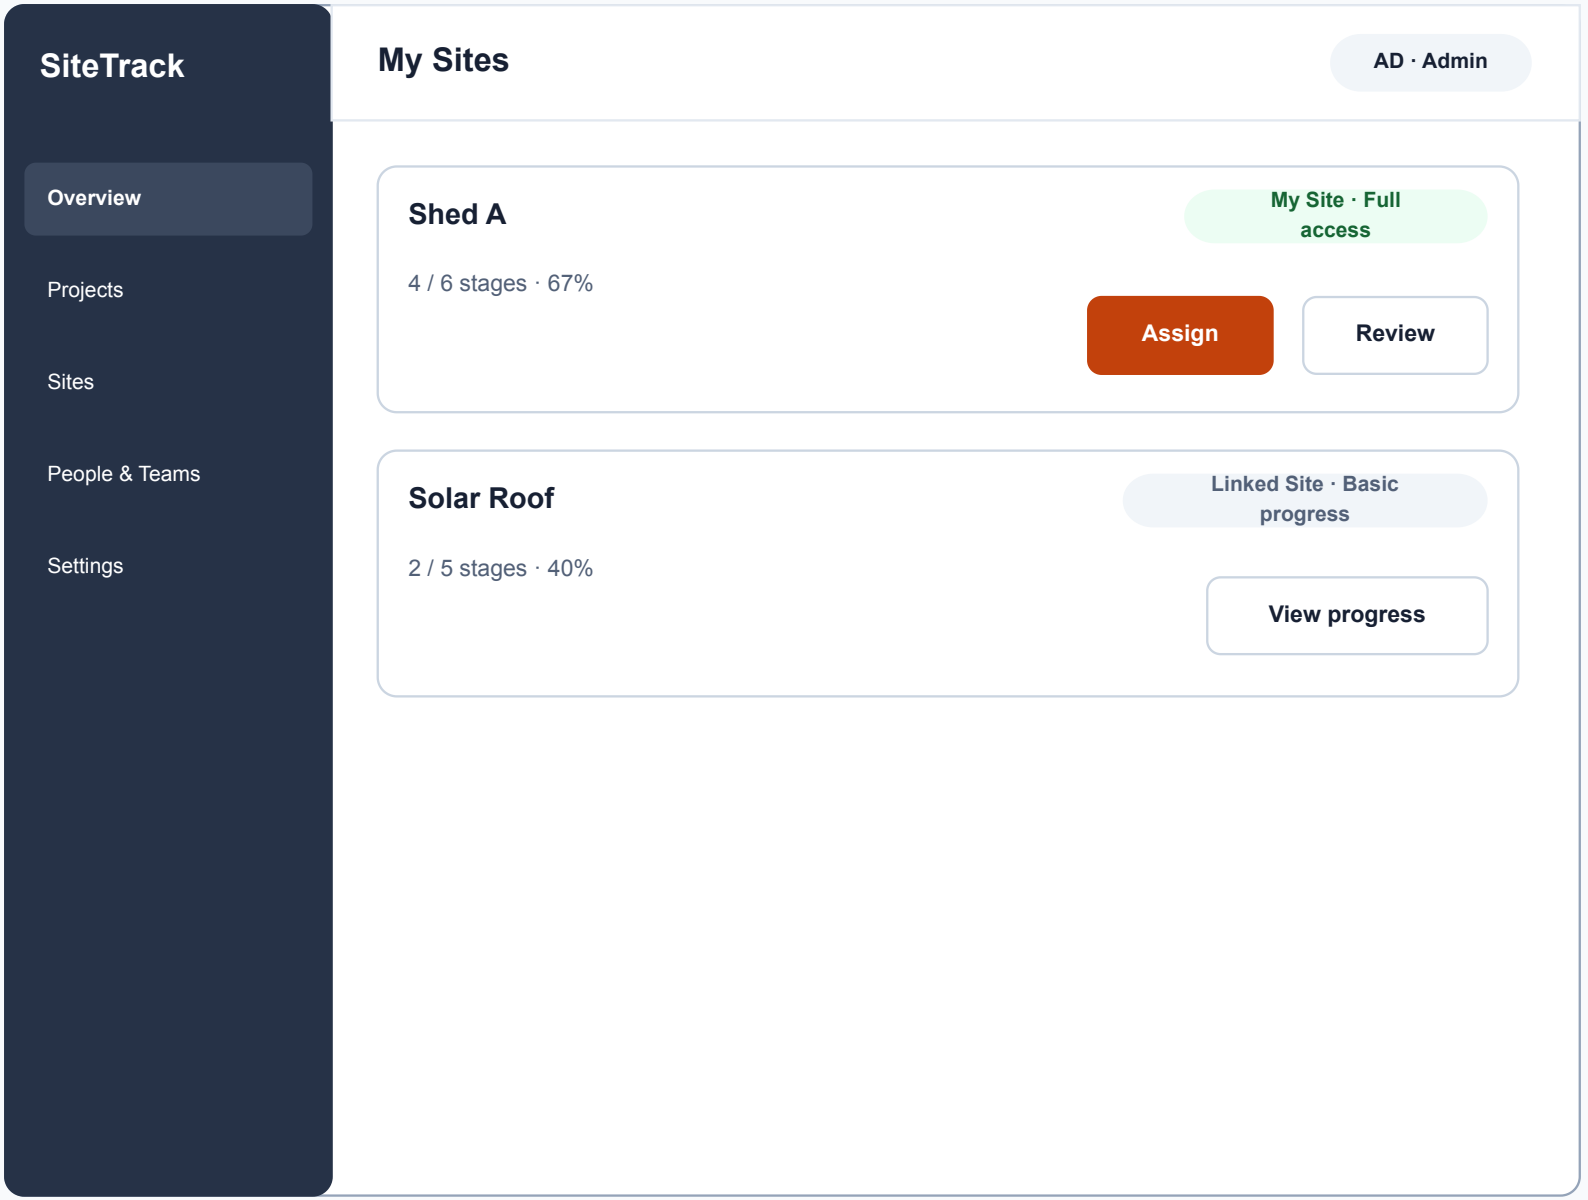

Review note: The Supervisor, Team or both can be changed while work is in progress.

Review note: A change does not reset progress or earlier evidence.

Coordinator dashboard and linked Site access

Coordinator · Web

Full actions for owned Sites; basic progress for another linked Site

Review note: Photos and evidence are not visible on another Coordinator's Site.

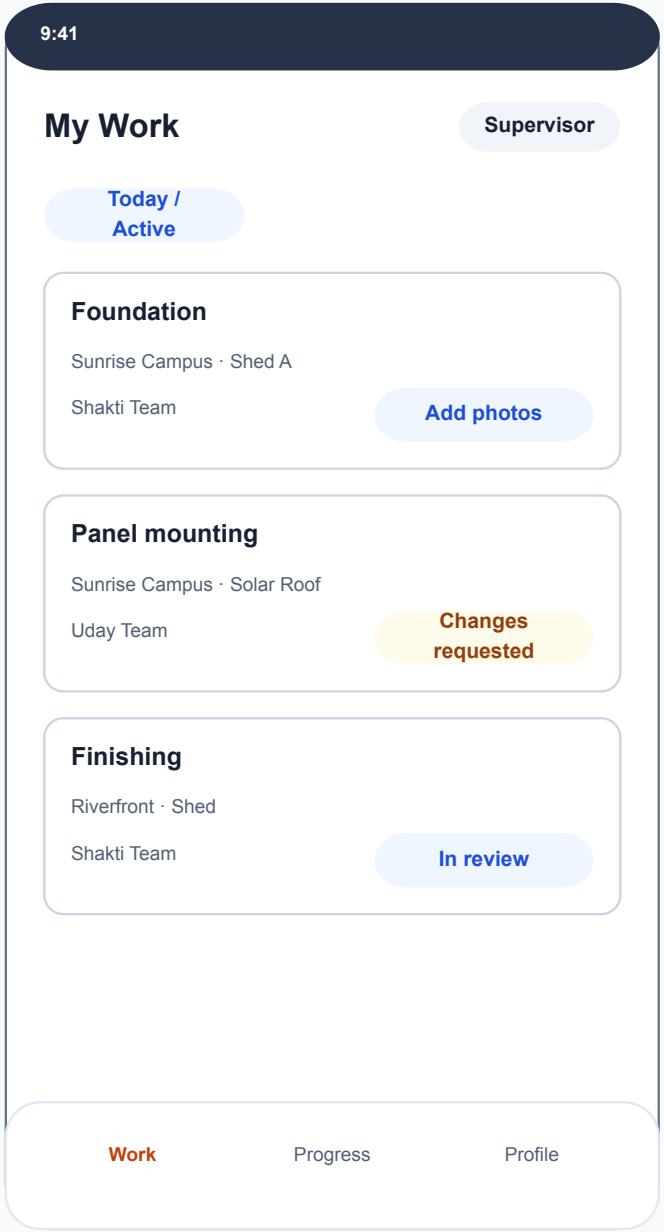

Review note: Assignment, upload, approval and edit controls are also hidden.

Decision pending: Confirm exactly how much information appears under “basic progress”.

Supervisor: My Work

A simple Android list of assigned stages

Supervisor · Android

Review note: The Supervisor sees only assigned work and the necessary Site/Team context.

Review note: The Android sketch uses three top-level items: Work, Progress and Profile.

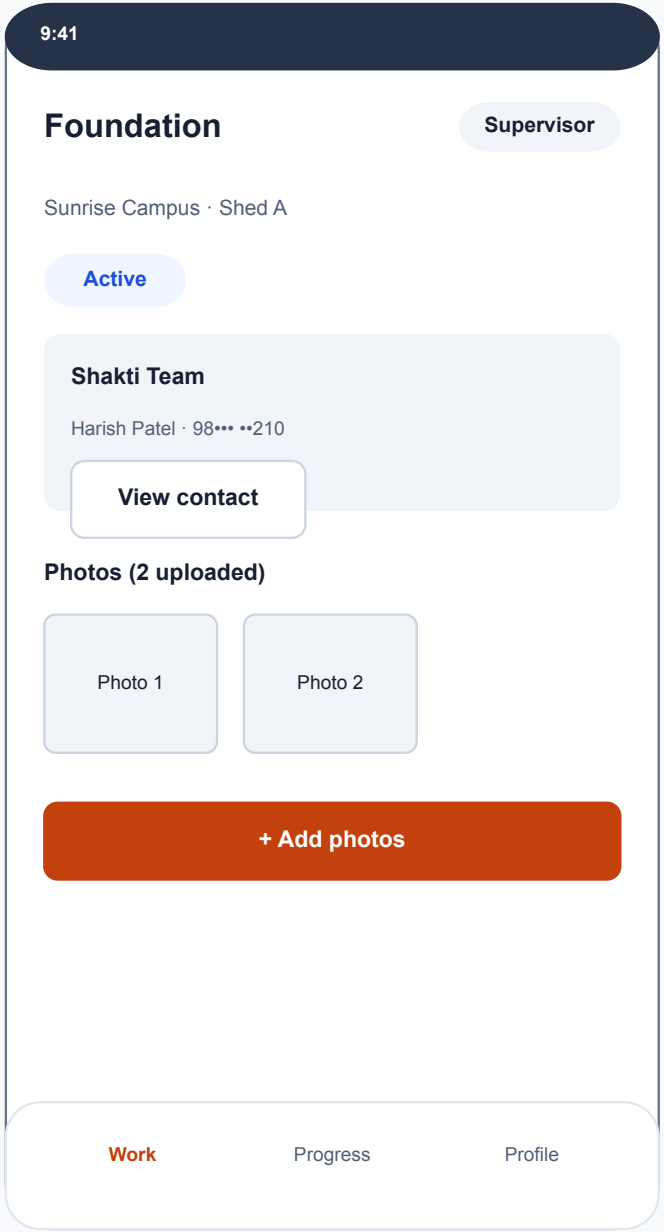

Review note: No GPS permission, no materials section, no offline/sync indicator.

Review note: Web and Android interfaces are English only. No other language is supported.

Supervisor: Stage details

Team contact, progress and evidence actions in one place

Supervisor · Android

Review note: Photo author and upload time remain in history.

Review note: Uploading photos does not automatically submit the stage for completion.

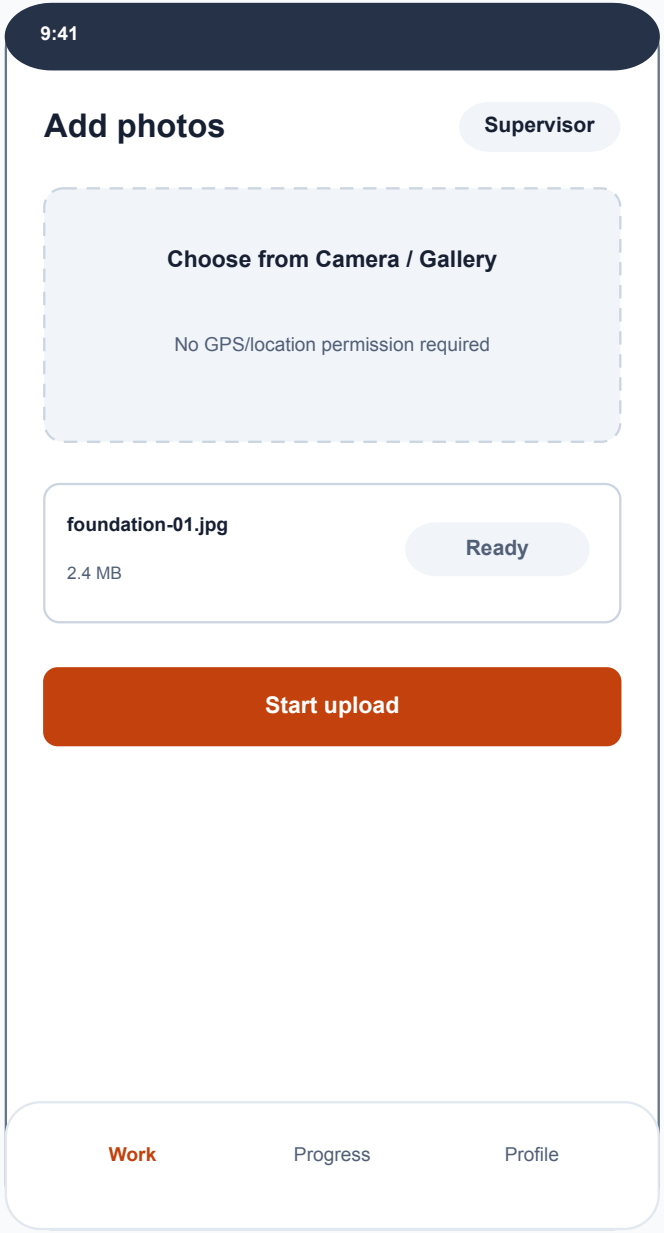

Review note: Team contact details are view-only; the Supervisor cannot edit them.

Review note: Old or unspecified features such as stage notes, audio and reminders are not added.

Online photo upload

Internet is required; only successful uploads count as evidence

Android

Review note: Show clear progress/loading during upload and prevent repeated taps.

Review note: A photo appears in evidence and counts toward completion only after success.

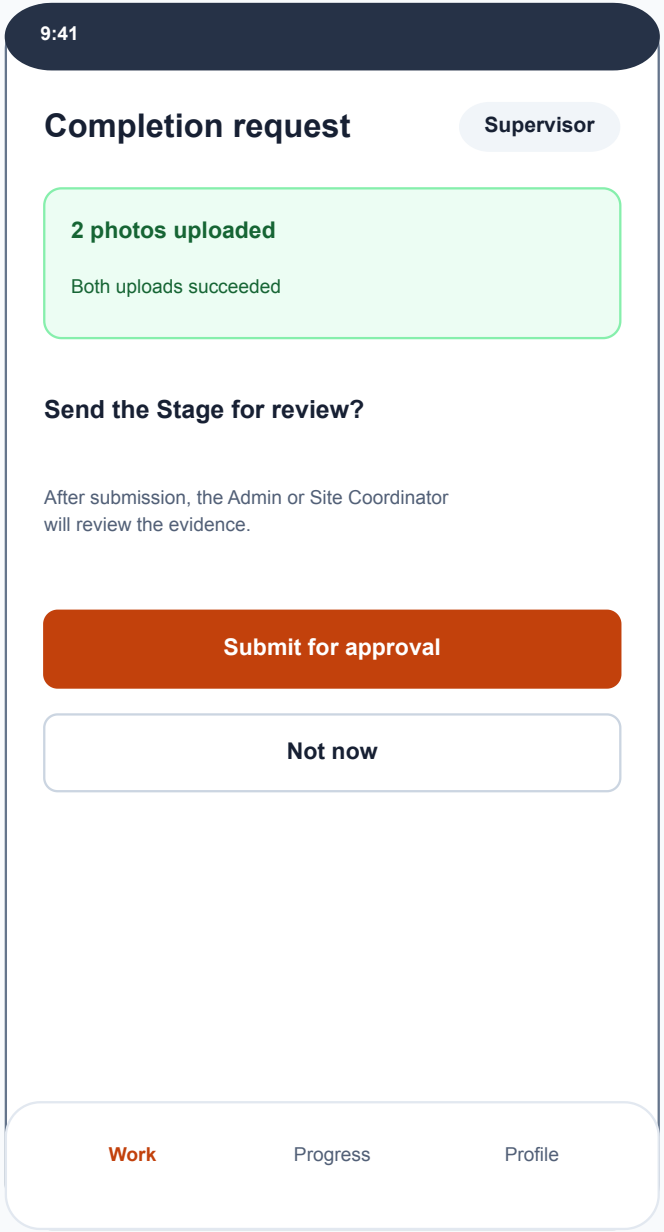

Review note: There is no offline save, background queue or automatic sync.

Decision pending: Photo size/type limits are not specified and must be decided before final design.

Stage completion request

Upload and completion request are separate actions

Supervisor · Android

Review note: A Supervisor cannot approve; they can only send a completion request.

Review note: Interrupted or failed photos do not appear in this count.

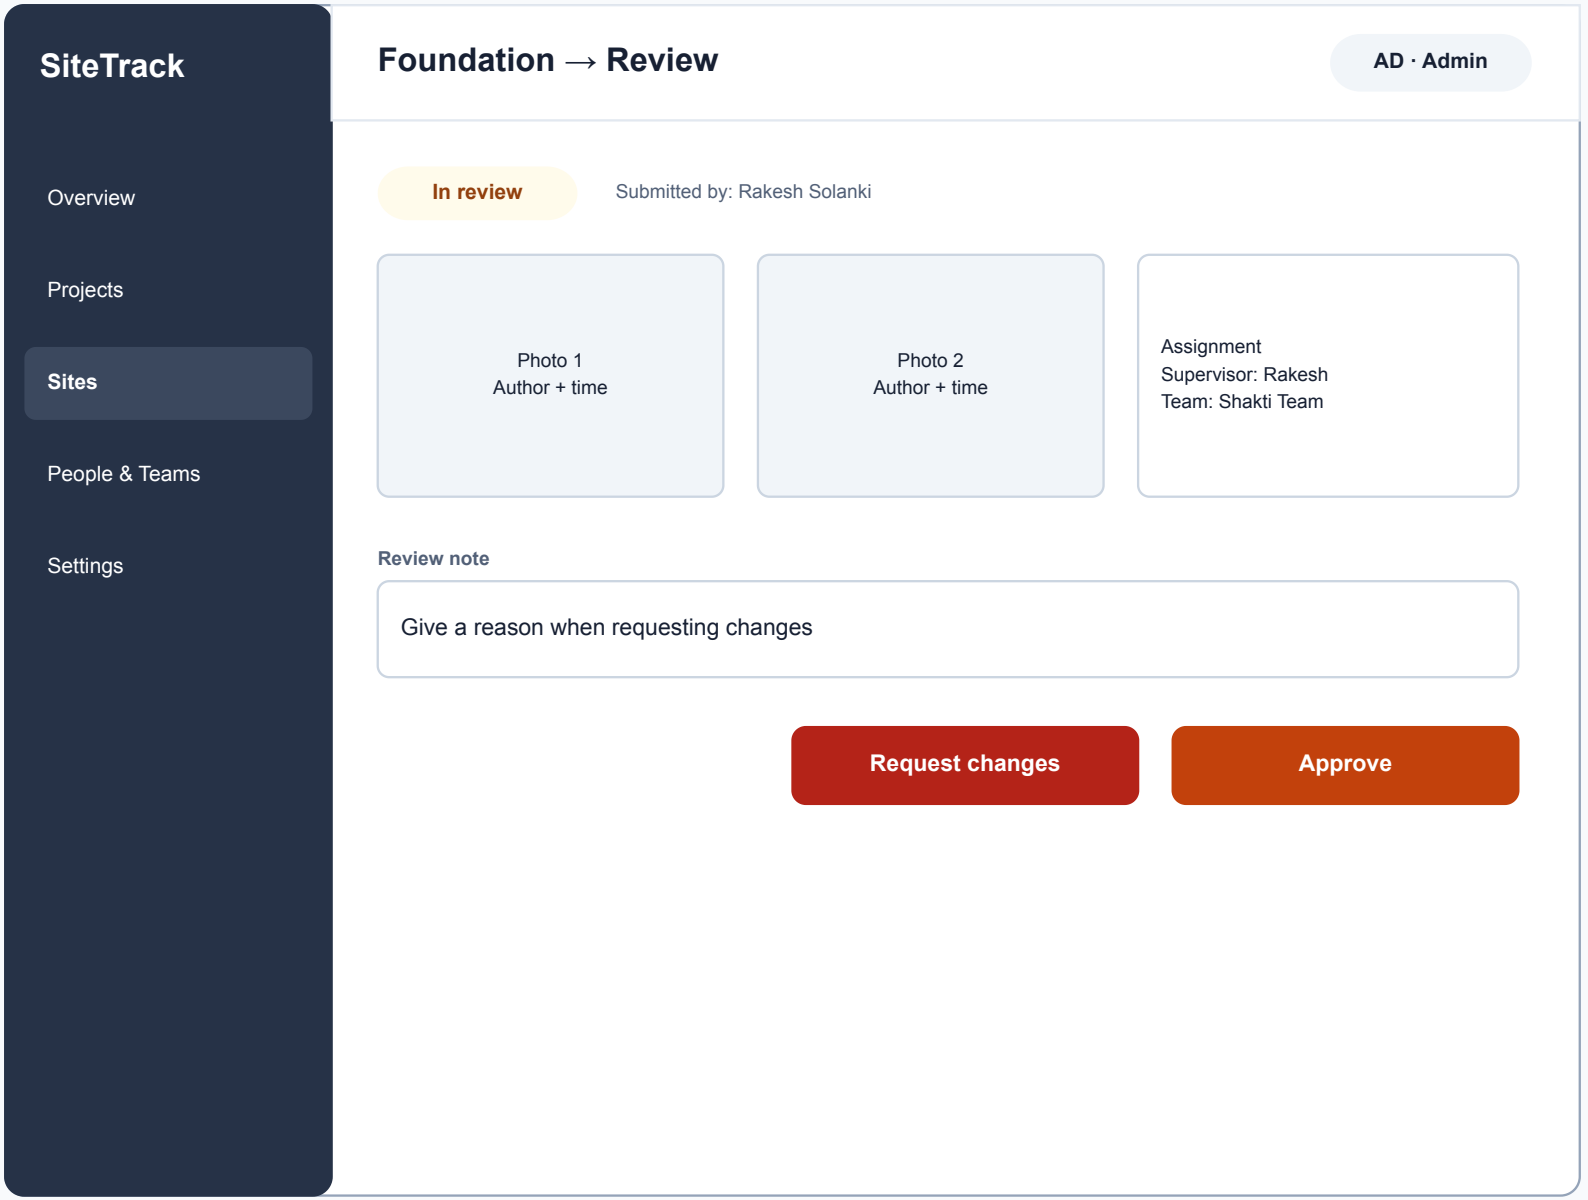

Review note: After submission, show a clear confirmation and review status.

Decision pending: Whether a request can be withdrawn is not yet decided.

Admin / Coordinator review

Web + Android

Review evidence, then approve or request changes

Review note: The Admin reviews all Sites; a Coordinator reviews only their own Sites.

Review note: Approve and Request changes are clearly separate actions.

Decision pending: Whether final-stage approval auto-completes the Site is still pending.

Coordinator absence-cover flow

Coordinator

A Coordinator can upload photos and separately approve their own submission

1

Receive photos from Team

Photos arrive outside the app

2

Upload under own name

Do not impersonate Supervisor

3

Completion request

Upload does not auto-complete

4

Separate review action

May approve own submission

The audit trail must show clearly

Uploaded by: Kavita Shah (Coordinator) · Submitted by: Kavita Shah · Approved by: Kavita Shah

Review note: This flow does not impersonate the Supervisor or silently reassign the Stage.

Assignment handover and visible history

Web + Android

Earlier evidence and progress remain after reassignment

Foundation · Shed A

Current: Supervisor Mehul · Shakti Team · 60% progress

Change assignment

Assignment history

Time	Changed item	Previous	New	Changed by
22 Oct · 11:10	Supervisor	Rakesh Solanki	Mehul Parmar	Kavita Shah
20 Oct · 16:25	Team	Uday Team	Shakti Team	Admin
18 Oct · 09:00	Supervisor + Team	—	Rakesh + Uday	Admin

Review note: Earlier photos and work records remain attributed to the original author.

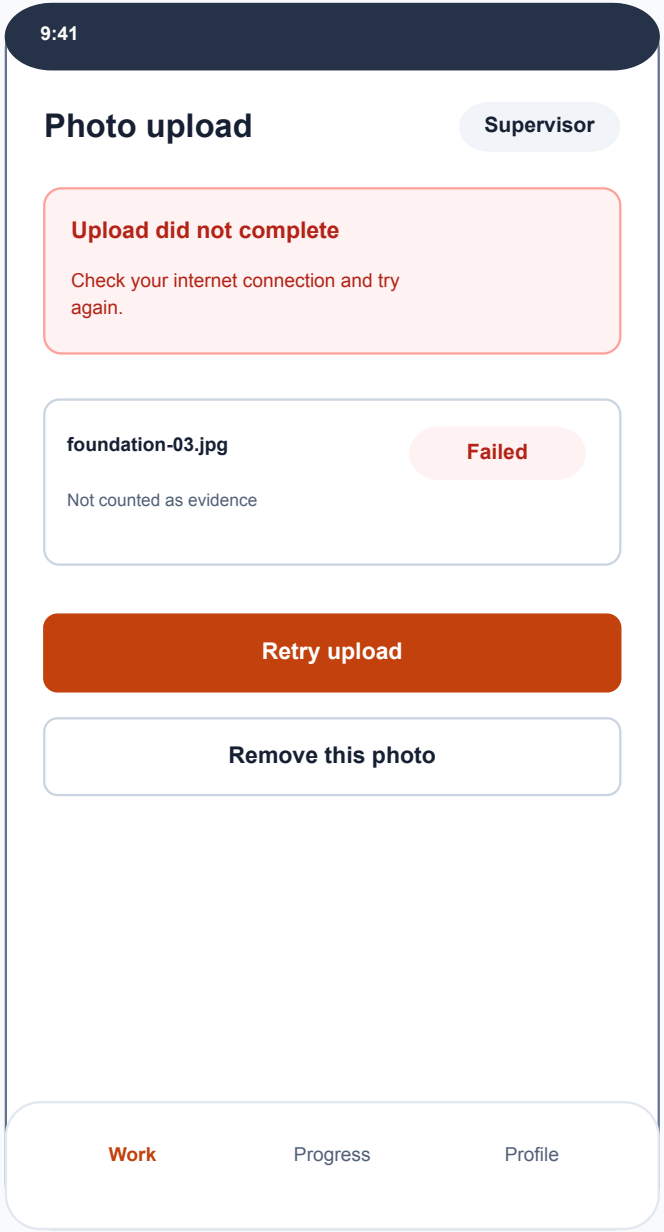

Review note: Every assignment change is retained as a separate entry.

Decision pending: The process for reopening a completed Stage is not defined.

Upload failure and explicit retry

Android

A failed upload is not shown as successful and does not count as completion evidence

Review note: The error gives both a cause and a recovery path: check the connection and retry.

Review note: There is no auto-retry queue; the user explicitly retries after reconnecting.

Review note: A failed file never receives a green tick or success message.

Review note: Show upload progress during retry and prevent duplicate taps.

Decisions to confirm with the client

These are not confirmed features; decide them before final design or development

P-01 **Pause / block / reopen**

Can an active Stage be paused? Who can reopen a completed Stage, and how?

P-02 **Stage dependency**

Are there required dependencies, such as finishing Shed before Solar starts?

P-03 **Status calculation**

Does final-stage approval auto-complete the Site? How is Project status calculated?

P-04 **Exact fields**

Which fields are required for Projects, Sites, employees and Teams?

P-05 **Basic progress detail**

How much progress detail is shown for another Coordinator's linked Site?

Review note: Audio notes, reminders, advanced dashboards, bulk actions and password policies are not in the current requirements and have not been added.
